PROJECT BACKGROUND

- Australian Clinical Dosimetry Service (ACDS) is an independent dosimetry auditing program
- They conduct dosimetry audits at radiotherapy clinics across Australia and New Zealand
- Current system uses an Excel spreadsheet to save calibration information from audits
- The primary aim is to provide an uplift to the legacy system and provide a web-based solution for employees

PRODUCT ROADMAP

USER STORIES

1. Manage audit forms
2. View audit forms
3. Manage account
4. Receive notifications
5. Export audit form

USER STORY MAP

Manage Account

Create Account

Assign Roles

Manage audit form

Edit Audit Form

Verify audit form

View Audit Form

Export File

Search Audit Form

Sprint 1 | 5

Create ACDS User Accounts

Assign roles to users for access control

Enter calibration data into audit form

Submit the audit form

View an individual audit form

Sprint 2 | 5

Approve audit forms submitted by a different user

Export the selected audit form in the desired format

Search audit form by serial number

Search by reference information

Filter audit forms by version

Sprint 3 | 5

Receive notifications on the dashboard regarding upcoming audit expiries

Receive notifications on the dashboard regarding expired audits

Receive notifications regarding new versions being published

View information in tooltips

Receive notifications on the dashboard regarding equipment expiries

13/05/2022

Zoom meeting interface showing three participants in a grid view. The participants are wearing headsets and are in a clinical setting. A large blue square with a white 'Z' is overlaid on the bottom right of the grid.

USABILITY TEST FEEDBACK

- Impressed with the aesthetic of the prototype
 - Colour scheme was on brand
 - Easy to use UI
- Data viewing and editing met the client's expectation
- Appreciated some system functionality was restricted between Admin and Non-Admin users
 - Form approval process was up to the clients standards
- Additional functionality is needed to change reference table data from within the system

ACTION PLAN

- Update high-fidelity prototype to include additional functionality based on usability test feedback
- Update user stories and user story map to reflect additional functionality

HANDOVER

- Generate release notes
- Generate release ZIP file
- Access to the high fidelity prototype
- Github
